## REMARKS

Claims 1, 3 and 14 have been amended. Claims 1-8, 11 -14 remain pending. Reconsideration and reexamination of the application are requested.

The Examiner has objected to Figs. 19 and 20 because they should be designated with a legend – prior art--. The Figs. have been corrected.

The Examiner rejected claim 1 because of an informality. Claim 1 has been corrected.

The Examiner objected to the Specification because of terminology in claim 14. The Examiner rejected claim 14 under 35 USC 112, first paragraph, as failing to comply with the written description requirement. The Examiner indicated that the language “the left and right suspension arms are each pivotally coupled to an axis of the left and right rear wheels, respectively” is contrary to what is described in the specification and shown in the drawings.

Applicant has amended claim 14 to read “the left and right suspension arms are each pivotally coupled to holders on an axis of the left and right rear wheels, respectively.” It is submitted that the specification and the language of the claims are now consistent. Applicant requests that the objection to the specification and that the rejection of claim 14 be withdrawn.

The Examiner rejected claims 3-6 and 14 under 35 USC 112, second paragraph as being indefinite. The Examiner’s comments have been considered, and claims 3 and 14 have been amended to make the claims definite.
